

Agenda

- Introduce project members and idea to mentors
- Solicit feedback re:
 - Project idea
 - Initial design
 - Teamwork plan

Progress Report

- Submitted initial design plan
- Planned out relationships between schemas
- Started implementing models

Minutes

- Meeting started at 2.30pm, all group members present + Harihar & Donald
- Discussed data model
 - e.g. Building insights - start/end with letters
 - clarify why we would want stand alone minilessons
 - clarified mutability markings and multiplicity markings. (submission & student)
 - submission currently can standalone without a student.
 - submission is currently mutable. we dont want it to be able to switch from one student to another.
- Discussed security issues
- Bare minimum -- link to video, question and answers, some way of viewing solutions/score
- Meeting ended at 3.00pm
